

(Unclassified // FOUO)

CSWC Operational Period Summary

0600 June 19 2018 to 1800 June 19 2018

During the summer, rattlesnakes are a significant threat to hikers, joggers, and animals. Snakes are also known to rest on bike paths, home patios, and river banks. Keep a keen eye out for these animals while out enjoying California!

SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

CAL OES Regional Activities in Response to Statewide Warm-Up:

- The Cal OES Regions have reached out to their respective Operational Areas (OAs) and polled for their activities related to the heat forecast.
- Cal OES Regional Duty Officers will continue to monitor the situation and provide updates as warranted.

Cal OES COASTAL REGION

- Nothing significant to report.

Cal OES INLAND REGION

- See Fire Activity Slides.

Cal OES SOUTHERN REGION

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

Per the Cal OES Southern Region AREP on 06/14/18 at 0846 hours:

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed there are no commercial premises currently involved and there is no public health risk due to this virus.
- Incident Management Teams (IMTs) transitioned on 06/16/18. The IMT Red Team started on 06/17/18.

Activations

- San Bernardino OA Emergency Operations Center (EOC) is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- One (1) Cal OES Southern Region Senior Emergency Services Coordinator (ESC) deployed to ICP as an AREP. Operational period of 0700-1900 hours.

FIRE ACTIVITY

Cal OES Fire Preparedness Levels		
National	Northern California	Southern California
Preparedness Level 2	Preparedness Level 1	Preparedness Level 2
	Multi-Agency Coordination System MACS Mode: 1	Multi-Agency Coordination System MACS Mode: 1

Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.

INLAND REGION

Wheeler, Vegetation Fire, Mariposa County

Location: Wheeler Gulch Rd. x Hwy 49, SW of Coulterville

Jurisdiction: State DPA, SRA/FRA, Madera-Mariposa-Merced Unit

Per Cal OES Duty Officers, as of 06/19/18 at [1841 hours](#):

- 115 acres grass and brush, [90% contained](#)
- Limited access and steep terrain
- 1 OES Engine Strike team assigned

MAJOR ROAD / HIGHWAY / BRIDGE CLOSURES

Major Road Closures		
Northern California	Central California	Southern California
No Lifeline Route Closures	No Lifeline Route Closures	No Lifeline Route Closures

Lifeline Routes

Nevada County:

- I-80 was closed to eastbound traffic 2.2 miles east of Floriston due to a disabled vehicle. [The route is reopened as of 06/19/18 at 1844 hours.](#)

Non-Lifeline Routes:

- There are no non-lifeline route closures.

Wildfire Closures:

- There are no wildfire closures.

Emergency Center Activations:

- There are no Emergency Center Activations.

No 911 Outages	No 911 Outages	911 Outage

911 Outages/Remote/Community Isolations:

Network Outage, Placentia, Los Angeles County

On 06/19/18 at 1807 hours, CA 911 Branch advised the California State Warning Center (CSWC) that Placentia Police Department (PD) in Los Angeles County is in alternate answer to Brea PD due to an AT&T network outage affecting all 911 lines at Placentia PD.

- The outage began on 06/19/18 at 1512 hours.
- Trouble shooting is in progress.
- Estimated time of restoral is unknown at this time.
- CA 911 Branch is monitoring and will provide updates when further information is received.

Service Interruptions:

- None reported.

WEATHER OF CONCERN

Weather of Concern

Northern California: Widespread triple digit heat is expected in the Sacramento Valley beginning Friday. These temperatures are expected to continue through the weekend, with Friday and Saturday being the hottest in the lower 100s. Overnight lows for Friday and Saturday will be mild, mid to upper 60s, there won't be much break from the heat, temperatures will remain warm. Sunday temperatures will be a little cooler, in the upper 90s.

Central California: An increase in temperatures across Central California is expected through the weekend. The highest temperatures will be near 110 degrees in the valley and desert Saturday and Sunday, with overnight low temperatures in the 70s to around 80 degrees.

Bay Area: Triple digit temperatures are possible Friday into Saturday, with Saturday being the warmest day, for interior locations, including the far northern East Bay, southern San Benito County to the far North Bay. The impact in the inland area is significantly warmer than what the Bay Area received in the Spring. Overnight recoveries in the hills will be poor, temperatures will stay warm, except for around the bay.

Southern California:

- Excessive Heat Warnings have been issued for several counties from Thursday through Friday.
- Some areas within Southern California will reach temperatures of 100-105 degrees; however, overnight temperatures will be around normal for this time of year which is taken into consideration for the Heat Risk Threat.

Operational Area Contingency Actions

- Please see attached for Cal OES Inland and Southern Region Operational Area Heat Contingency Actions.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

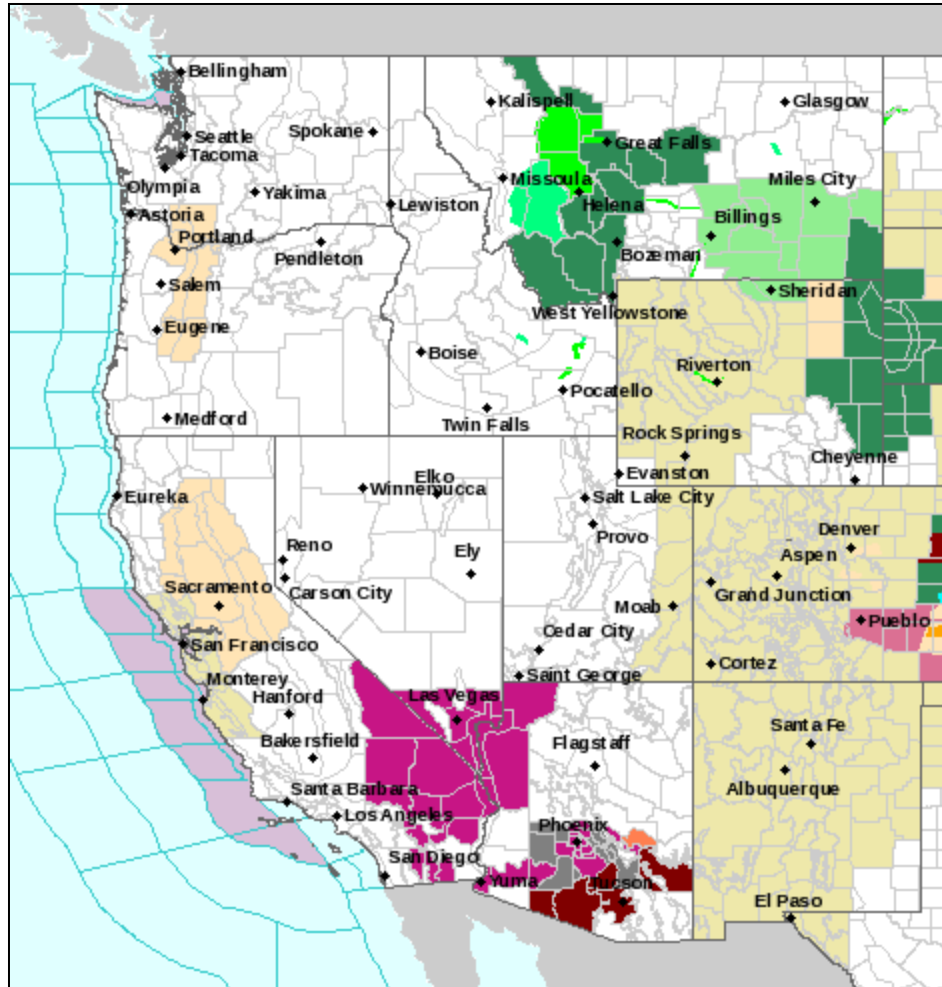

High pressure is pushing north over California today for the start of a mostly hot, dry spell for Northern California. The exception will be a weak weather system moving across our northern areas Wednesday that will probably lead to some isolated afternoon and even overnight showers or thunderstorms in our northern mountains, primarily north of a line from Humboldt Bay across northern Trinity County to the southern Modoc County line. Temperatures will be near seasonal values for the next few days, then will begin to rise quite a bit. Expect the warmest inland valleys to generally be 100-105 Thursday through the weekend at least with some cool down currently expected early next week. Immediate coastal areas will continue to see cool marine layer effects. There is the possibility of some northerly to off shore winds developing Friday night through Saturday night that would help warm things up in the Sacramento Valley and may lead to some warming along the coast.

SOUTHERN CALIFORNIA

Very warm and dry this week

A prolonged period of above normal temperatures is expected this week as high pressure remains over the area. Temperatures will warm 5-10 degrees today and Wednesday under strong June sunshine. Highs will range from the 90s in the valleys and lower foothills of Southern California to 105 in the San Joaquin Valley to 115 in the low desert Wednesday through the end of the week. Minimum relative humidity (RH) will drop into the 10-15% range for 6-8 hours each afternoon away from the coast. There are some locally gusty winds in Santa Barbara County and the I-5 Corridor early this morning and some wind gusts to 30 mph will be possible today through noon. Similar wind speeds can be expected in these same areas tonight into Wednesday morning. Apart from these two areas, winds should be light this week with local sea breezes to 15 mph along the central coast and other wind prone areas. Expect little change through Friday with marine layer coverage only reaching the immediate coast by the end of the week. Slightly cooler weather will return over the weekend, but overall, temperatures will remain slightly above seasonal averages the next 7 days. No thunderstorms or strong winds are expected the next 7-10 days.
